Other Programs/Skills: Git, AWS, Azure, Linux/Bash, Figma/Photoshop, VS Code, REST API

WORK EXPERIENCE

Front End Developer – *Self Employed*

June 2018 - Present

- Designed and developed websites for diverse clients with a large variety of frameworks and platforms, primarily React or Wordpress
- Created functional backend services with Node.js and MongoDB
- Provided consultation services for user experience and front-end JavaScript
- Leveraged Git/Github for version control and collaboration with clients

Shopify Web Developer – *Sukoshi Mart*

October 2021 - August 2022

- Developed custom page functions and templates in Shopify using Shopify Liquid 2.0 and JavaScript to attract customers and boost sales
- Ensured pixel-perfect page designs aligned with provided design wireframes
- Diagnosed and resolved errors or bugs on strict deadlines
- Integrated Shopify plugins/apps into existing pages and elements
- Managed version control with Git on platforms like Github
- Collaborated effectively primarily independently with minimal guidance
- Implemented Ruby cart scripting for custom discounts on specific product variants

Junior Front End Web Developer – *The Brick*

May 2019 - March 2020

- Developed custom page functions and templates in Shopify using Shopify Liquid 2.0 and JavaScript to attract customers and boost sales
- Ensured pixel-perfect page designs aligned with provided design wireframes
- Diagnosed and resolved errors or bugs on strict deadlines
- Managed version control with Git on Bitbucket
- Collaborated effectively within a team with frequent guidance or feedback

EDUCATION

Bachelor of Science in Computer Science – *University of Calgary* – 2018
